TECHNOLOGY MODERNIZATION

Your IT architecture is only as strong as the strategy behind it.

Acquisitions, organizational change, and fast growth have left in their path legacy technologies that slow down business processes or disperse data across multiple systems in different ways–while today's market and regulations demand greater operational agility and flexibility. Your organization's technologies must be positioned to support these efforts, not impede them.

Our technology modernization services–Portfolio Assessment, Modernization Delivery, Integration Solutions, and Legacy Conversion–extend beyond the scope of IT to holistic business transformation.

"We have found NEOS' versatility, speed, and expertise to be extraordinary. NEOS is an excellent partner when you need a variety of mission critical business systems."

CIO, World's Leading Credit Ratings Company

YOUR CHALLENGES

Modernizing a technology environment is complicated and costly

Gaining insight into what technology currently exists, where it resides, and what it does can be difficult

Securing, accessing, and understanding the lineage of data that resides in multiple systems makes compliance and regulatory efforts difficult

Supporting, fixing, and integrating legacy and often outdated systems can be labor-intensive, costly, and inefficient

HOW IT WORKS

Portfolio Assessment

Organize your technology portfolios to simplify oversight and optimize return on investment. Understand how products, processes, and technology drive your business. Digital transformation consulting services from our expert team employ proven, adaptable methods for rationalizing and simplifying large portfolios of business products, processes, and technology.

Modernization Delivery

Align your technology goals with your business goals and priorities. We explore your architecture, processes, and data–and how these realities support or detract from your organization's goals. We apply strategic and forward-thinking solutions that are grounded in practicality, and we engage with your teams to launch your modernization initiatives–or implement the entire plan for you.

Integration Solutions

Our NEOS Delta Force team quickly acts on every major aspect of a modernization activity and creates a practical and realistic impact and feasibility perspective–so you can have the most accurate view of anticipated cost, risks, and impact on your organization. Our Delta Force teams will do "mini" conversions that can better prove out future-state technology and align ROI.

Legacy Conversion

When you understand objectively how your current systems are performing, you can make appropriate decisions about what and when to update legacy systems. In fact, not all modernization efforts require in a change in technology. We offer insight on the complexity of your system and the dependency on other programs and databases.

THE BENEFITS

Gain A Complete View	Improve Fluidity of Data	Avoid Business Interruption	Elevate Data Efficiency	Hone A Competitive Edge
Obtain a holistic understanding of your systems and the health of your IT infrastructure–so you know what and when to update.	Integrate existing systems with modern applications–or create a single repository–for information to flow between systems.	Establish a strategy for migration with minimal or no interruption to your business.	Improve access to data and increase ability to meet compliance and regulatory requirements.	Build a modern technology infrastructure that enables you to leverage the latest systems and applications that help create a competitive edge.
