

AGILE HEALTH ASSESSMENT

The promise of “better delivery through Agile” often goes unfulfilled.

The Agile Health Assessment leverages NEOS' own Agile experience and proven quantitative and qualitative assessments to establish a baseline from which we deliver continuous improvement recommendations and a roadmap to accelerate your Agile journey. Through our proprietary set of eight Agile lenses we will capture and dashboard how effectively your organization is using Agile best practices to deliver business and IT value rapidly and predictably.

*Transform your organization
with our provocative Agile Health
Assessment.*

“We have done amazing things together. We implemented Agile and attained monthly releases, achieving in a few months what it took a comparable team here two years to achieve.”

VP of IT, Multinational Finance and Insurance Corporation

COMMON CHALLENGES

You're not certain that your deliverables will fit an Agile delivery model.

Team members struggle with adoption and to shed pre-Agile behaviors; leaders perceive a lack of transparency and rely on legacy communications.

There is poor line of sight into planned work; delivery is less predictable when the opposite was expected.

Promised improvement in speed-to-value and improved quality has not been realized.

Teams have plateaued and struggle to self-organize, preventing continuous delivery improvement.

HOW IT WORKS

Observe and Assess

We observe ceremonies, evaluate organizational structures, and assess the application of Agile principles to examine the level of Agile maturity in your organization. We apply an Agile team examination to gain insight into your internal perspectives regarding the relative success of your Agile transformation.

Analyze and Diagnose

Through our proprietary set of eight Agile lenses we will capture how effectively your organization is enabling Agile programs to deliver business and IT value rapidly and predictably.

- | | |
|---|---------------------------------|
| 1. Alignment of Deliverable to Delivery Model | 5. Ceremonies and Communication |
| 2. Roles and Responsibilities | 6. Delivery |
| 3. Engagement | 7. Success and Quality Measures |
| 4. Tools and Training | 8. Sustainability and Support |

Adjust and Adapt

We work with your Agile leadership, product owner/product managers, scrum masters, and delivery teams to recommend and roadmap necessary adjustments to your delivery framework. We design and implement short term improvement opportunities while building out the long-term approach, so by the end of the assessment period the organization is already working more effectively.

On-Going Reassessments

After the assessment and implementation of the short-term improvement opportunities, our team can support your continuous improvement efforts, ensuring you achieve the benefits associated with effective Agile delivery, and offering guardrails to ensure your delivery teams stay focused. The level of involvement in this subsequent phase varies depending on the needed level of Agile transformation.

THE BENEFITS

Root Cause Diagnosis and Analysis

Gain invaluable insight into opportunities and inconsistencies across teams, paired with recommended how-to based solutions.

Improve Delivery

Develop a robust culture of continuous delivery improvement and high visibility resulting in boosted credibility and health of relationships with business partners.

Deliver ROI

Ensure your scrum teams deliver the value your stakeholders expect when they expect it.

Reduce Risk of Overspend

Avoid continued investment in struggling programs – deliver the most critical business value early, adjust priorities with purpose and complete programs within budget.
